ABOUT ME

Front-end developer passionate about technology and innovation, with over 6 years of experience transforming code into accessible and scalable experiences. Driven by curiosity, I am constantly seeking the latest trends and best practices. In the workplace, I love to collaborate on new ideas and integrate into dynamic teams towards exceptional results.

EXPERIENCE

Senior Front-end Engineer

2020 – 2024

MJV Technology & Innovation

During my experience, I was assigned to the Mercedes-Benz client, where I led the implementation of new functionalities in the internet banking system. I also performed maintenance and refactoring of legacy features, in addition to coordinating the update of Angular version (from 6 to 16). Throughout this process, I significantly contributed to the creation of component standards, ensuring a solid foundation for the project's future.

Front-end Engineer

2019 - 2020

PRAVALER

Throughout my journey, I worked on the project of the exclusive area for students with financing, collaborating with the UX team to develop new functionalities. I performed maintenance and refactoring of old features, as well as providing support for user inquiries on the website. In partnership with other developers, I actively participated in defining code standards for the project, ensuring its quality and efficiency.

UX/UI Designer / Junior Front-end Engineer

2008- 2019

Senac São Paulo

I was responsible for creating visual concepts for products and events. I developed intuitive and appealing interfaces for websites and applications, aiming to provide the best user experience. I led the coordination of a multidisciplinary project for the construction of a portal, coordinating between the areas of design, technology, and writing. Additionally, I created dynamic hotspots for events and campaigns of the institution.
